GETS/WPS INFORMATION

Sudden communication disruption resulting in network congestion or degradation can be the result of common incidents, such as weather-related events, cyber-attacks, and human errors.

Telecommunications Service (GETS) and Wireless Priority Services (WPS). These federal programs enhance communication during disasters by allowing certain users to have prioritized communication access via wireline commercial networks and some priority of cellular networks and wireless. Please see the attached flyer and share with your partners.

ASPR UPDATES: PROTECTING VULNERABLE POPULATIONS FROM COVID-19, MRNA INFLUENZA VACCINE DEVELOPMENT, NATIONAL STRATEGY FOR DOMESTIC CHEMICAL SECURITY AND PREPAREDNESS

On Friday, January 17, ASPR announced an award to Moderna through the Rapid Response Partnership Vehicle (RRPV) consortium of approximately \$590 million. This funding will allow Moderna to accelerate development of mRNA-based pandemic influenza vaccines, including an H5N1 mRNA vaccine that is well matched to strains currently circulating and an H7N9 mRNA vaccine, and to enhance mRNA platform capabilities so that the U.S. is better prepared to respond to other emerging infectious diseases. Please see our [news release](#) for more information.

CRISIS STANDARDS OF CARE

The [ASPR TRACIE Express: November 2024 Update](#) has several resources available and webinars to attend. Including information on the following opportunities:

- [Crisis Standards of Care Considerations](#)
- [Intravenous Fluid Shortage Strategies](#)
- [Shortage Strategies and Resources: Peritoneal Dialysis Solution](#)
- [National Healthcare Coalition Preparedness Conference](#)
- [Palliative Care Annex](#)
- [Crisis Standards of Care Indicators and Triggers](#)

ASPR TRACIE RESOURCE SPOTLIGHT: CRISIS STANDARDS OF CARE CONSIDERATIONS: PHARMACEUTICAL AND SUPPLY SHORTAGES

Crisis Standards of Care (CSC) originally assumed the conditions causing patients to be placed at risk would be pervasive and due to a catastrophic disaster. During the COVID-19 pandemic, many pharmaceutical products, including vaccines, monoclonal antibodies, and remdesivir, had to be rationed. Even in the absence of a disaster situation, frequent product shortages – such as RhoGAM, blood products, radiologic contrast, chemotherapy agents, blood culture bottles, and intravenous fluids – place patients at substantial risk of a poor health outcome.
