SPECIAL PATHOGENS PREPAREDNESS CONFERENCE

June 10, 2025 from 8:30 – 4:30 p.m.

A full-day, hybrid event designed to enhance hospital and EMS readiness for highly infectious disease outbreaks. The event includes expert speakers, interactive tabletop exercises, and scenario-based learning. Participants will gain practical tools and strategies for managing supply chain disruptions, coordinating EMS transport, and improving crisis communication. Each organization will leave with a ready-to-use tabletop exercise to support ongoing preparedness training.

In-Person Location: Kellogg Center, Lansing, MI & Regional Host Sites: **University Center, Gaylord, MI** and Island Resort & Casino, Harris, MI

Who Should Attend:

Hospital emergency preparedness teams, EMS leaders, infection preventionists, public health officials, safety officers, and communicators.

TEEX MGT-319, POINT OF DISPENSING, PLANNING AND RESPONSE

September 17-18, 2025

Course Time: 8am-5pm

Location: North County Training Room
(4191 17 Mile Road)

Kent County Health Department is hosting TEEX MGT-319, Point of Dispensing, Planning and Response. This course is a guide for local health officials and their partners to coordinate plans to provide mass distribution of medical countermeasures in response to a large-scale public health incident. This course focuses on planning considerations, recommendation to achieve the Centers for Disease Control and Prevention's (CDC's) 48-hour standard for Mass Prophylaxis, and the local community's Mass Prophylaxis and Point of Dispensing (POD) site preparedness. The course material is applicable to pandemic influenza, bio-terrorism, and other public health emergencies.

Please make sure you get supervisor approval prior to registering.

HHS and DARPA Collaborate with Industry to Enhance Domestic Health Manufacturing Efforts

The industry partners selected to launch projects under this program include Battelle Memorial Institute and Aprexia; BrightPath Laboratories; Rutgers University; and the Mark Cuban Cost Plus Drug Company. Four innovative demonstration projects are now underway, leveraging artificial intelligence, machine learning, and informatics to make essential medicines onsite at the point of care using small manufacturing platforms, some no larger than a standard refrigerator, rather than full-size production facilities. All of the projects are expected to submit abbreviated new drug applications to the U.S. Food and Drug Administration within a year as a part of this government-supported development work.

Additional details on these four projects can be found in the recent ASPR press release.

TRAIN COURSES - EFFECT OF DISASTERS ON MENTAL HEALTH: AWARENESS LEVEL & TECHNICAL LEVEL

The Awareness Level course is intended for anyone who will come into professional contact with disaster victims, including DMAT, hospital workers, EMTs, primary care providers and public health workers. There are three sections in this course:

- Section 1: Disaster, Trauma and Proximity to the Event
- Section 2: Psychophysiology of Trauma and Fear
- Section 3: Tools for Understanding

The Technical Level course is intended for anyone who will come into professional contact with disaster victims, including DMAT, hospital workers, EMTs, primary care providers and public health workers. In addition to providing general knowledge, this course emphasizes two practical skills: administering psychological first aid to disaster victims in the immediate aftermath of a disaster, and screening disaster victims for common mental health disorders in the months that follow.

Access the free one-hour courses at the links below.
