NEW COURSE COLLECTION FOR NURSING CREDITS

There is a new a specially curated CNE course collection for nurses, now available on MI-TRAIN from the Public Health Foundation.

This collection brings together highly rated (4+ star) courses across key public health topics, making it easier than ever to earn Continuing Nursing Education (CNE) credits - all in one place.

MI-TRAIN UPDATE: MSP LMS CHANGE

The Michigan Department of Health and Human Services, Division of Emergency Preparedness and Response (MDHHS/DEPR) and the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) have partnered since 2011 to provide a learning management system (LMS), MI-TRAIN, to offer emergency management courses to partners across disciplines. Beginning in fall 2025, MSP is moving to a new LMS, Cornerstone, for all its courses and conferences.

MDHHS/DEPR continues to support the MI-TRAIN system and users will maintain access to their training histories within the system. MDHHS/DEPR and other partners will continue to host classes and conferences on MI-TRAIN. No accounts will be manually deactivated during the MSP transition. If prerequisites for classes in Cornerstone need certificates currently stored in MI-TRAIN, it is the user's responsibility to upload them into Cornerstone.

ASPR TRACIE - TIPS FOR HEALTHCARE FACILITIES

Assisting Families and Loved Ones after a Mass Casualty Incident

MCIs cause great concern among the loved ones of the wounded, missing, or deceased, who may rush to healthcare facilities, reunification centers, or the incident site to seek information and reunification. The updated resource Tips for Healthcare Facilities: Assisting Families and Loved Ones after a Mass Casualty Incident highlights best practices and issues related to planning for, activating, and operating hospital or healthcare facility Family Support Centers.

HHS and DARPA Collaborate with Industry to Enhance Domestic Health Manufacturing Efforts

The industry partners selected to launch projects under this program include Battelle Memorial Institute and Aprecia; BrightPath Laboratories; Rutgers University; and the Mark Cuban Cost Plus Drug Company. Four innovative demonstration projects are now underway, leveraging artificial intelligence, machine learning, and informatics to make essential medicines onsite at the point of care using small manufacturing platforms, some no larger than a standard refrigerator, rather than full-size production facilities. All of the projects are expected to submit abbreviated new drug applications to the U.S. Food and Drug Administration within a year as a part of this government-supported development work.

Additional details on these four projects can be found in the recent ASPR press release.
Press Release

BP2 TRAINING OPPORTUNITIES FOR MICHIGAN VOLUNTEER REGISTRY ADMINISTRATORS

Please see the flyer below for information on upcoming Budget Period 2 (BP2) Michigan Volunteer Registry (MVR) training opportunities. These sessions, including both MVR Administrator trainings and monthly MVR virtual office hours meetings, will cover key topics such as the current and new MVR system platforms, volunteer management, and core MVR functionalities.

For any questions, please contact Elizabeth Shepard or Stephanie Steele.

TRAIN COURSE - EFFECT OF DISASTERS ON MENTAL HEALTH: CHILDREN AND ADOLESCENTS

This course emphasizes practical skills: administering psychological first aid to children and adolescents in the immediate aftermath of a disaster, screening them for mental health disorders in the months that follow, and involving parents and other caregivers throughout the process.

Access the free one-hour course at the link below.
Access MI-TRAIN

TRAIN COURSES - EFFECT OF DISASTERS ON MENTAL HEALTH: AWARENESS LEVEL & TECHNICAL LEVEL

The Awareness Level course is intended for anyone who will come into professional contact with disaster victims, including DMAT, hospital workers, EMTs, primary care providers and public health workers. There are three sections in this course:

- Section 1: Disaster, Trauma and Proximity to the Event
- Section 2: Psychophysiology of Trauma and Fear
- Section 3: Tools for Understanding

The Technical Level course is intended for anyone who will come into professional contact with disaster victims, including DMAT, hospital workers, EMTs, primary care providers and public health workers. In addition to providing general knowledge, this course emphasizes two practical skills: administering psychological first aid to disaster victims in the immediate aftermath of a disaster, and screening disaster victims for common mental health disorders in the months that follow.

Access the free one-hour courses at the links below.

STRATEGIC NATIONAL STOCKPILE UPDATE: KEY RESOURCE CHANGES

The U.S. Department of Health & Human Services has announced major changes to the Strategic National Stockpile (SNS) aimed at improving efficiency and responsiveness during public health emergencies. Two long-standing federal assets are being retired:

Going forward, SNS responses will focus on delivering incident-specific medical countermeasures, reducing sorting time and waste at the receiving end. These changes will not reduce the availability of needed resources but will shift how support is requested and received.
